Bring your spouse or a friend

Presidents Message

It was great to see the nice turnout for Al Stirt's demo. Of course now It will be expected we will be seeing more very perfectly centered bowls at show and tell. OK No pressure. That water spray does help, doesn't it? Has anyone changed over to an air driven system To sand with ? Maybe if I ever get my shop moved out of the dungeon ill consider it.

Have you thought of something to share at January's Saturday afternoon meeting ? We can still fit you in.

The cast so far is : *Tom Raymond, Dennis Curtis and Steve Brooke.*

- Tom has made many of his own tools jigs etc, has taught woodturning I can personally attest to and he runs an active shop, he certainly has a lot to share.
- Dennis, while at the club is normally behind the video camera . He steps out to show us how he makes those fine spherical shapes so true to shape you see in the show and tell lineup.
- Steve has a professional background dealing with various finishes, their makeup and their interactions , who sometimes even makes his own, will share some of this invaluable info.

With the craft shows nearly done and only a few gifts to,finish up i hope to soon find some time to clean out the shop so i can at least turn around to get out !

Have a happy and safe holidays and we Hope to see you at the party Wednesday, Lanny
