

# Maine Woodturners

## Newsletter

---

Our demonstrator for the February 19<sup>th</sup> meeting is

**Chuck Seguin**

### Three Sided Twisted Goblet

Last years demo left Chuck just short on time to get into the twisting and turning, the ins and outs and the tool techniques needed to accomplish the tasks of Multi Axis turning.

His goal in this demonstration is to do a little review of the four basic turning cuts and to jump right into making a Twisted Goblet

# President Message

---

Even though it's snowing up a storm right now as I write this Its sure good to see the days getting longer. I've got a little way to go before all of next seasons wood is out But I think I have enough turning stock ahead. Well, maybe almost...Naw, never !!!

The AAW is promising us a new website soon. Don't forget to check it out A small number of people appear to be using the great resource we have in the film library. Stop by the table and talk with Duane or Connie to see what they have or give them any ideas you have for new films it may be worthwhile for us to purchase.

While it is a great camera system we have now we did get off to a rocky start trying to get the high resolution recordings transferred to disc. The Butlers now have this under control and are adding our demos to their inventory again.

Also, if you may have a film of your own you no longer need and would like to donate it to the club, that would be great!

Unless I have a volunteer step up ill need to go pointing a finger for our March demo. That should be on the 19th also. Then the next week a good bunch of us will be headed for New York. How about you?

*Lanny*

# Secretary's Report

---

The January meeting of Maine Woodturners was held at Erskine Academy in South China, Maine on Saturday the 25<sup>th</sup> at 1:30 PM. Forty-six members and guests were in attendance.

President Lanny Dean opened the meeting at 1:32 PM by announcing Tom Raymond as the first demonstrator. Tom focused on the use of hot melt glue for mounting tennons on turnings.

Tom was followed by Dennis Curtis who demonstrated his method of turning spheres by rotation through 3 axes.

Denis was followed by Steve Brooke who discussed the use of finishes other than polyurethane.

Dave Barden offered laminate coated boards 30 X 42 inches at 5 dollars each to be sold at the next meeting.

Show and tell was waived at the end of the demo's and the meeting ended at 3:50 PM.
